MinJun Huang

UX/UI Designer

+44 7780 808417 | huangminjun1@gmail.com | minjun-huang.github.io | behance.net/minjunhuang1 | London

PROFILE

MSc User Experience Design graduate who designs in Figma and builds in HTML, CSS and JavaScript. Experienced in user research, prototyping and e-commerce product pages, and used to taking work from first wireframe to a live, tracked site, including my own portfolio and client projects. I pick up new tools quickly and want a junior UX/UI, product or digital design role in London where I can learn from a team.

SKILLS

Design	Figma, Photoshop, Illustrator, Canva, Miro
Dev	HTML, CSS, JavaScript, PHP, MySQL
Tools	Google Analytics 4 (certified), Microsoft Office, Power BI
Languages	English (fluent), Mandarin (native), Cantonese (native)

PROJECTS

Greener

A gamified mobile app that encourages local residents to help keep public green spaces clean

- Ran user research with surveys and 12 interviews to find engagement barriers and define core features.
- Designed user flows and high-fidelity prototypes in Figma, with a design system of reusable components.
- Ran usability tests on the prototypes and refined the key flows after each round.

SitAware

A wellness app that reminds office workers and students who sit for long periods to take breaks

- Designed the core break reminder flow, where reminders only get stronger when ignored, and high-fidelity screens in Figma.
- Built a clickable prototype covering the main user journey.

Everyman app redesign (concept, in progress)

A concept redesign of the cinema app that tells guests before they arrive when they can order food to their seat

- Found while working at the cinema that seat ordering is open only during the trailers, and that the app and the seat QR sticker do not say so.
- Designed 8 screens in Figma with light and dark modes, colour variables and text styles.

Personal Portfolio Website, minjun-huang.github.io

- Designed, built and deployed the site with HTML, CSS and JavaScript on GitHub Pages.
- Set up Google Analytics 4 with custom events for CV downloads and section views to track engagement and drop-off.

EXPERIENCE

Freelance Web Designer and Developer

Remote, UK — Oct 2025 to present

- Design and deliver custom back-office and e-commerce web systems for small business clients, from requirements to launch.
- Built the order, product, stock, supplier and user management modules in PHP and MySQL.

Team Member

Everyman Cinema, London — Apr 2026 to present

- Run stock counts and restocking, and keep product status accurate on the till system.

E-commerce Intern

Shenzhen Pro Fashion Co. Ltd., China — Feb 2023 to Aug 2023

- Designed visual assets for seasonal promotions, working with the sales team to match campaign plans.
- Designed product images and page layouts for product detail pages to improve the online store experience.
- Ran market research on brand positioning and led the logo redesign for the updated visual identity.

EDUCATION

MSc User Experience Design, Kingston University, London — 2024 to 2025

BSc Digital Media, Guangzhou College of Technology and Business, China — 2020 to 2024
